Grid System and Single row structure

The default Bootstrap grid system utilizes 12 columns. It's responsive grid and adapts to viewport. Below 767px viewports, the columns become fluid and stack vertically. The fluid grid system uses percents instead of pixels for column widths. Each row always include 12 columns (for example col-md-8 + col-md-4 = col-md-12).

Bootstrap documentation: [here](#)

Basic grid HTML:

```
1 <div class="row">
2   <div class="col-md-1">.col-md-1</div>
3   <div class="col-md-1">.col-md-1</div>
4   <div class="col-md-1">.col-md-1</div>
5   <div class="col-md-1">.col-md-1</div>
6   <div class="col-md-1">.col-md-1</div>
7   <div class="col-md-1">.col-md-1</div>
8   <div class="col-md-1">.col-md-1</div>
9   <div class="col-md-1">.col-md-1</div>

0.1 CSS Files and structure

If you would like to edit the color, font, or style of any elements, you would do the following:

```
1 #primaryContent a {color: #someColor;}
```

If you find that your new style is not overriding, it is most likely because of a specificity problem. Scroll down in your CSS file and make sure that there isn't a similar style that has more weight.

I.E.

```
1 #wrap #primaryContent a {color: #someColor;}
```

So, to ensure that your new styles are applied, make sure that they carry enough “weight” and that there isn't a style lower in the CSS file that is being applied after yours.

Colors

The theme includes a css file which you can use to edit the colors.

You just need to add the corresponding CSS file to the head of the page like this:

```
1 <head>  
2   (...)  
3   <link rel="stylesheet" type="text/css" href="css/motive.css">  
4   (...)  
5 </head>
```

Icons

We've included 360+ font icons.

Utilities

Utility classes are low-level structural and positional traits. Utilities can be applied directly to any element, multiple utilities can be used together and utilities can be used alongside component classes.

Utilities are intended for frequently used CSS properties and patterns, like: floats, containing floats, vertical alignment, text truncation. Relying on utilities can help to reduce repetition and provide consistent implementations.

Estate uses utilities for the following categories:

0.1 Topbar

There are two available types of topbar:

- .ct-topBar
- .ct-topBar-darkStyle

To use any of them, first use the following HTML markup:

```
1 <div class="ct-topBar ct-topBar--darkStyle">
2   <div class="container">
3     <div class="row">
4       <div class="col-sm-7 col-md-7">

0.1 Footer

The screenshot shows a dark-themed footer with the following sections:

- ABOUT ESTATO**: Includes a short paragraph about the theme and links to Address, E-mail, and Fax.
- CONTACT US**: Includes phone numbers (0 800 123 4567, 0 800 123 4562), a fax number (+1 500 700 800), and social media links (Facebook, Twitter, Instagram).
- QUICK LINKS**: Links to List Property, Login, Home, Register, Properties, Pricing, Agents, Terms & Conditions, Features, About Us, Privacy Policy, and Contact Us.
- LATEST LISTINGS**: Shows three property listings with images, names, and prices:
 - 1856 Misty Concession, Colonsay \$ 650/month
 - 3046 Merry Landing, High Lonesome Wells \$ 650/month
 - 5454 Fallen Deer Wood, Flat Nose \$ 650/month

At the bottom, there's a copyright notice, payment method icons, a newsletter sign-up form, and a 'Subscribe' button.

You can use the following variations of footer:

- .ct-footer-light (add it for change style to light version)
- .ct-footer-extended
- .ct-postFooter

0.1 Forms

Estate comes several variations of form, available with the following CSS classes:

Classes:

- .ct-formSearch-extended
- .ct-searchFormMobile

- .ct-formRegister
- .ct-formContact-map
- .ct-contactForm-small
- .ct-form-label-type1
- .ct-form-label-type2
- .ct-popupForm

The image shows a dark-themed login interface. At the top left is a small user icon. To its right, the word "LOGIN" is written in white capital letters. Below this, there are two input fields: one for "Your Email" and one for "Password". Underneath the password field is a link that says "Forgot Username / Password ?". At the bottom center is a large orange button with the word "Login" in white.

0.1 Javascript

All javascripts are placed in folder /js. In main.js file we implement all functions calls.

This theme uses following Javascript scripts:

- 1. Media Sections
- 2. Datepicker – I use this for calendar widget in blog sidebar.
- 3. Gmaps
- 4. Headroom – Plugin for navbar options, same is in Diana.
- 5. Magnific Popup.
- 6. Pagescroller – Onepager navigation.
- 7. Owl Corusel – slider
- 8. Isotope – gallery categories sorting.
- 9. Select2 – overwrite a standard select.
- 10. Slider Bootstrap – amount slider.
- 11. Device.js – check what device we use.
- 12. Appear.js – check a status of element(is in viewport or not)
- 13. browser.js – check what browser we use
- 14. snap.js – snap event on mobile device

jquery.appear

This plugin call function when element appear in viewport. This is used in custom animation, progress bars, counter timer.

Documentation: <https://github.com/bas2k/jquery.appear/>

```

1 if (jQuery().appear) {
2     if (device.mobile()) {
3         // disable animation on mobile
4         jQuery("body").removeClass("withAnimation");
5     } else {
6         jQuery('.withAnimation .animated').appear(function () {
7             jQuery(this).each(function () {
8                 jQuery(this).addClass('activate');
9                 jQuery(this).addClass($(this).data('fx'));
10            });
11        }, {accY: -150});
12    }
13}
```

0.1 Google Map

Available parameters:

- .ct-js-googleMap
- .ct-js-googleMap-single

data:

- data-location
- data-zoom
- data-icon
- data-offset
- .ct-js-googleMap-group

data:

- data-display-desc (yes/no infowindow)

For markers we use JSON array:

```
1 var data = JSON.parse('[' +
```

```

2      ' {"address": "301 w 4th Street, New York", "image": "assets/images/301_w_4th_street_new_york.jpg"},

After click on sorting panel we switch class “ct-showProducts-default” and “.ct-showProducts-list”.

This classes change styles of boxes.

We are using the following javascript for search:

```
1  var $tilesItems = $("#ct-js-showTiles");
2      var $listItems = $("#ct-js-showList");
3      var $showProducts = $(".ct-js-search-results");
4
5
6      if($tilesItems && $listItems){
7          $tilesItems.click(function(e){
8              e.preventDefault();
9
10             var $existListClass = $(".ct-showProducts--list");
11
12             if($existListClass){
13                 $showProducts.removeClass("ct-showProducts--list");
14                 $showProducts.addClass("ct-showProducts--default");
15                 $showProducts.css("display", "none");
16                 $showProducts.fadeIn();
17
18                 $(this).addClass("is-active");
19                 $listItems.removeClass("is-active");
20             }
21         });
22
23         $listItems.click(function(e){
24             e.preventDefault();
25
26             var $existDefaultClass = $(".ct-showProducts--list");
